EXPERIENCE

Technical Trainer C3 AI

September 2024 – Present
Redwood City, CA

- Awarded 1st place at the C3 Agentic AI Hackathon 2025 for creating agentic tooling that significantly boosted developer efficiency in UI component creation
- Led the development of C3 AI's training website, launching an LMS for 8,000+ learners using JavaScript, HTML, and CSS while navigating evolving requirements and tight deadlines
- Designed and built internal productivity tools to automate customer-facing processes, utilizing React, JavaScript, Next.js, and Electron.js, leading to a 80% reduction in the time to send learners feedback
- Developed and administered curriculum for 8,000+ learners in data science, machine learning, and application development using the C3 AI framework, JavaScript, and Python, following Scrum methodologies.
- Resolved customer obstacles through personalized debugging sessions with engineers from various industries

Full-stack Developer (University Research) Colorado State University

December 2022 – January 2024
Fort Collins, CO

- Engineered full-stack geospatial data visualizations (React, TypeScript, Python, Flask, MongoDB) for the [Urban Sustain Project](#), providing researchers intuitive access to 20TB+ datasets
- Received the Excellence in Data Science Award at CSU's Celebrating Undergraduate Research Competition
- Collaborated in a 12-member agile team, managing source control and adhering to Scrum methodologies

Data Science Intern Hewlett-Packard Inc.

May 2023 – August 2023
Vancouver, WA

- Enabled long-term market trend analysis by building three ETL data pipelines, extracting data from AWS S3 buckets, and loading it into the AWS RedShift cloud data warehouse
- Developed expertise in data transformation, filtering, and verification using SQL and Python within a relational database
- Applied machine learning techniques with Scikit-Learn and Facebook Prophet, and visualized predictions using Matplotlib and Seaborn

PROJECTS

Nature Nomads - eCommerce Platform - [GitHub](#)

- Developed a fully functional travel platform for booking guided nature tours
- Implemented front-end using JavaScript, HTML, CSS, and Pug for dynamic and responsive user interfaces
- Built back-end with Node.js, Express.js, Mongoose, and MongoDB
- Integrated Stripe for secure payment processing, allowing users to purchase tours seamlessly
- Ensured platform reliability through end-to-end unit testing with Jest and SuperTest
- Configured CI/CD pipelines with Github Actions for automated testing and deployment

Using Dijkstra's Shortest Paths to Route Packets in a Network Overlay - [GitHub](#)

- Designed and implemented a distributed network of N nodes capable of routing packets based on Dijkstra's shortest path algorithm in a simulated network topology

EDUCATION

Colorado State University
Bachelor of Science in Computer Science
Minor in Mathematics
GPA 4.0
Summa Cum Laude and Dean's List

Fort Collins, CO
Graduated May 2024

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C/C++, SQL, Bash, HTML, CSS

Frameworks: React, Node.js, Express.js, Mongoose, Hadoop, Apache Spark, PySpark

Testing: JUnit, Jacoco, Mockito, Postman

Developer Tools: MongoDB, Git, GitHub, TensorFlow, Keras, Databricks, DBeaver, Pip, Cargo, NPM, Redshift, Amazon S3 Buckets, Zenhub, VS Code, PyCharm, IntelliJ

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib
